

CLI ATM Simulator

DOMAIN: JAVA DEVELOPMENT

TIMELINE: WEEK 1

RELEASE: BATCH 2026

1. Project Scope & Description

Build an ATM simulator handling PIN authentication, deposit, withdraw, and transaction history.

2. Key Technical Requirements

- 1. Manage user state using class structures and variables.
- 2. Validate pin entries and block accounts on three fails.
- 3. Store current balance and print transactions logs.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
