

## Deep Learning Foundations Textbook

DOMAIN: JOBIFY STUDY LIBRARY

TIMELINE: REFERENCE TEXTBOOK

RELEASE: BATCH 2026

### 1. Project Scope & Description

A theoretical textbook covering linear algebra Review, Multi-Layer Perceptrons backpropagation, CNN pooling filters, LSTM gates, and deep learning architectures.

### 2. Key Technical Requirements

- 1. Deep Neural Logic: Mathematical linear equations, activations functions, weights.
- 2. Computer Vision: CNN pooling layers, kernel image scans, classifications.
- 3. Model Server: Package model binaries inside FastAPI endpoint routes.

### 3. Assignment Submission Guidelines

%<sup>a</sup> GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%<sup>a</sup> LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%<sup>a</sup> Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

#### & p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
