

Object Classifier (Convolutional Neural Network)

DOMAIN: AI / MACHINE LEARNING

TIMELINE: WEEK 6

RELEASE: BATCH 2026

1. Project Scope & Description

Design CNN layers with PyTorch to perform object classification on CIFAR-10 datasets.

2. Key Technical Requirements

- 1. Implement convolutional layers with pool parameters.
- 2. Run backpropagation iterations adjusting filters.
- 3. Evaluate classification test accuracy statistics.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
