

Student Database with File Persistence

DOMAIN: C++ DEVELOPMENT

TIMELINE: WEEK 4

RELEASE: BATCH 2026

1. Project Scope & Description

Implement C++ file streams (fstream) to save and load student data records from a physical text file.

2. Key Technical Requirements

- 1. Write structured student record lines into files.
- 2. Parse files line-by-line using std::getline features.
- 3. Validate file opening parameters before executing.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
