

Web Price Scraper & CSV Exporter

DOMAIN: PYTHON DEVELOPMENT

TIMELINE: WEEK 5

RELEASE: BATCH 2026

1. Project Scope & Description

Create a BeautifulSoup/Requests web scraper to fetch product names and prices from an e-commerce page and export the results to a CSV file.

2. Key Technical Requirements

- 1. Parse static HTML pages using BeautifulSoup HTML trees.
- 2. Extract multiple element values (titles, prices, ratings).
- 3. Clean whitespaces and export outputs cleanly to a CSV file.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
