

Full-Stack Project Integration

DOMAIN: WEB DEVELOPMENT

TIMELINE: WEEK 7

RELEASE: BATCH 2026

1. Project Scope & Description

Connect your React frontend with the Express/MongoDB backend. Implement registration/login forms, save state across page reloads, and verify data flows between client and server.

2. Key Technical Requirements

- 1. Solve CORS policy issues between localhost ports.
- 2. Store auth session token credentials in client context state.
- 3. Connect form fields inputs directly to backend controllers.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
