

Interactive JavaScript Calculator & To-Do App

DOMAIN: WEB DEVELOPMENT

TIMELINE: WEEK 2

RELEASE: BATCH 2026

1. Project Scope & Description

Create a modern, fully functional dynamic calculator and a persistent To-Do list application that stores tasks in LocalStorage and handles user input events.

2. Key Technical Requirements

- 1. Manipulate the DOM dynamically using JavaScript queries.
- 2. Persistent state: Save list items inside localStorage.
- 3. Implement event listener hooks for additions/deletions.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
