

React Hooks & State Management

DOMAIN: JOBIFY STUDY LIBRARY

TIMELINE: REFERENCE TEXTBOOK

RELEASE: BATCH 2026

1. Project Scope & Description

Deep dive into the React.js components library, custom hooks design, Context API, state updates optimizations, and virtual DOM algorithms.

2. Key Technical Requirements

- 1. Component Design: Write modular, reusable, functional UI components.
- 2. React Hooks: Apply useState, useEffect, and custom hooks handlers.
- 3. Context API: Connect global states cleanly across separate pages.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
