

Advanced Desktop GUI Calculator (Tkinter)

DOMAIN: PYTHON DEVELOPMENT

TIMELINE: WEEK 4

RELEASE: BATCH 2026

1. Project Scope & Description

Design and implement a graphical user interface (GUI) desktop calculator app using Python's native Tkinter library.

2. Key Technical Requirements

- 1. Create a grid-based desktop layout matching standard calculator grids.
- 2. Bind button click events to update the display output.
- 3. Implement clear, backspace, and float arithmetic operations.

3. Assignment Submission Guidelines

%^a GitHub Repository: Create a public repository on GitHub. Push your source code files regularly and write a professional README.md with screenshots and setup instructions.

%^a LinkedIn Sharing: Write a brief post sharing what you built, what technologies you used, and what you learned. Tag @Jobify and attach a screenshot/video.

%^a Portal Submission: Paste both your public GitHub repository URL and your LinkedIn post URL inside the student assignment submission panel.

& p CRITICAL SUBMISSION POLICIES:

Verify that your GitHub repository visibility is set to public. Private links cannot be analyzed by our automated evaluation engines and may lead to credit deductions.
